Forecast For Northwest England
Issued by Met Office Exeter
at 0400 on Sunday 23 May 2021

++ Valid for broadcast between 0600 and 1800

Headline:
Widespread rain arriving later this afternoon.

Today:
A cloudy day with scattered showers. Further cloud moving in from the west will bring an area of locally heavy rain in the late afternoon. Winds starting light but increasing throughout the day. Maximum temperature 11 deg C (52 deg F).

Tonight:
Rain will continue spreading eastwards across the region, leaving heavy downpours over some areas. Strong winds for a time but soon easing through the evening. Minimum temperature 4 deg C (39 deg F).

Monday:
Often cloudy with showers, heavy at times and carrying a risk of thunder and hail. The best of any dry spells will be in northern areas during the afternoon. Maximum temperature 13 deg C (55 deg F).

Outlook for Tuesday to Thursday:
Mostly cloudy on Tuesday and Wednesday with a chance of showers. Breezy. Drier on Thursday with lighter winds. Remaining rather cool throughout outlook.
